SpeedoHealer v4

The most popular speedo and odo calibrator

No matter what sprockets or tyre size you use, the SpeedoHealer v4 will deliver precise readings to your meters. Don't let uncalibrated readings ruin your fun and degrade your bike's resale value. Get your fix today!

Also available in dual-bank version with remote A-B switch!

⚡ Programmable calibrator

Calibrate your bike's speedometer to get 100% accurate reading – even with the most radical sprocket swaps!

⚡ Unit converter

Convert Km/h to MPH or vice versa on import vehicles or during your trip abroad.

⚡ Top speed memory

Recall your true top speed to your factory speedometer by the press of a button.

SpeedoHealer v4 TSD

SpeedoHealer with Top Speed De-restrictor function

Remove the top speed restriction on motorcycles and ATVs which are limited via the speed signal (such as the CBR1000RR, VFR800X, GL1800, VFR1200F, ZX-10R, ZX-12R, ZX-14, FZ-09, MT-09, YZF-R1, V-Max, Can-Am, Kawasaki, Polaris ATVs and many more).

For racing purposes only, not suitable for street use!

⚡ Cheaper upgrade

The TSD version is compatible with all SpeedoHealer v4 harness kits, so when upgrading, you need to order the unit only.

⚡ Smart tech

You can set the TSD unit to either 'freeze' the speed signal to the ECU at a specific threshold, or apply a stronger calibration value so that the speed signal will be increased at a slower rate above the set threshold.

Gipro ATRE G2

Gear indicator with built in ATRE function

Small size, huge gains! The new ATRE is a killer combo for many riders. Advanced TRE function, auto brightness control and touch sensor in this new version for maximum satisfaction!

⚡ Touch control

Touch sensor for convenient switching between specific modes and for adjusting various options.

⚡ 7 ATRE + Bypass mode

The ATRE G2 gear indicator comes with a switchable, 7 mode (+ bypass) advanced TRE function to increase power.

⚡ Light sensor

The display brightness is adjusted automatically. The sensitivity of the sensor can be fine tuned if desired.

Gipro DS-series G2

The ultimate plug 'n go gear indicator

The Gipro DS-series is a gear indicator designed for bikes with factory diagnostic connector. Improved signal processing for fast response and flawless function. The best DS gear indicator just got better! Just plug it in and you're ready to ride!

⚡ Touch control

Touch sensor for accessing the menu and for adjusting various options.

⚡ Plug 'n Go

No cutting and splicing needed. Just connect it and you're ready to go. It can't get any easier than this.

⚡ Light sensor

The display brightness is adjusted automatically. The sensitivity of the sensor can be fine tuned if desired.

Optional
Gipro Mount
available.
Compatible with
all Gipros and
Shift Light
pro!

Gipro X-type G2

Advanced and highly compatible gear indicator

Next generation gear indicator with all the latest tech. Touch control, auto brightness, high speed warning and shift light function – all in a neat package. Extra bright LED, 5 display colours to choose from. And on top of that, this is the most compatible of all Gipro. Meet the all new X-type!

Ultra fast response

Improved signal processing for fast response and flawless function. The best universal gear indicator just got better!

New functions

Touch control for effortless adjustments of various parameters. Updated High Speed Warning and Shift Light functions.

5 display colour options

Simple and clear front face with Red, Blue, Green, Yellow or White display options. Auto dimming for night time use.

Gipro Mount

Handlebar mount for Gipro gear indicators

This optional accessory is the best way to mount your Gipro on the handlebar. Fits all handlebar sizes and mounts on clip-ons too. The housing can be fixed in any angle on the clamp. High quality, billet aluminium construction, available in black and chrome finish.

⚡ Rigid, weatherproof construction

⚡ Shift Light pro compatible

⚡ Simple installation

Shift Light pro

Programmable shift light module

Shift Light pro - Shift like a pro!
This freely programmable, 3 stage shift light module can act as a full-on shift light assistant or as an optimal rev range indicator for better fuel economy and longer service life.

Total control with your Android device via Bluetooth connection!

Crushing rivals

Smallest Shift Light module in the world with unique features courtesy of the Shift Light pro.

Combo unit

Two main functions: Shift light for racing/sport applications. Optimal rev range indicator for best consumption.

Endless compatibility

One unit fits all motorcycles, ATVs, cars and other vehicles.

QuickShifter easy

Next generation standalone quickshifter

Easy to install. Easy to setup. Easy on your wallet.
The perfect choice for anyone aiming for quicker lap times, better 1/4 mile runs or simply MORE FUN on the road.

The only quickshifter on the market with iOS & Android support!

Awesome tech

Change settings any time you wish through your phone, wirelessly, without hassle.

Simple installation

With our special ring sensor and the bike specific wiring harnesses, installation couldn't get any simpler than this.

Best choice

Packed with unbeatable features for an unbeatable price. Best price/value.

X-Tre Power Box

De-restrictor module for x-tra power

Unleash the hidden powers of your machine! Eliminate the factory low gear restrictions and remove the top speed limiter with this super easy and affordable mod. Let the fun begin!

⚡ Power & torque gains

Improves throttle response and increases power & torque in the lower gears.

⚡ No sacrifice

Preserves the function of the factory Gear Position Indicator.

⚡ Increased top speed

Removes the top speed limiter on all 1000cc+ Suzuki bikes.

FI Tuner pro

Fuel injection tuning module

A true MAP-based fuel injection tuning module for Suzuki motorcycles. Improves engine performance and torque, smoothens power delivery and throttle response throughout the REV-range.

⚡ Superb compatibility

One module fits most Suzuki EFI motorcycles from 1997 to 2014.

⚡ Highly advanced tech

Total control over the FI system.
3 independent, user-selectable maps,
easy fuel management.

⚡ Smallest in the world

It is the smallest, most compact FI tuning module on the market.

Best
value for the
money among
the current
FI modules on
the market!

ES Eliminator

Exhaust servo eliminator module

Remove the bulky and heavy exhaust servo motor when replacing the end-can or the full exhaust system. Plus, it will get rid of the FI light coming on when disconnecting the servo motor. Get the job done right with the help of the tiny, but mighty ESE!

⚡ Awesome tech

Built-in microprocessor ensures optimal function and offers great compatibility. Just plug it in and enjoy the ride!

⚡ Size champ

The unit itself is almost smaller than the OEM connector it connects to.

⚡ Endless compatibility

Works with all aftermarket slip-ons, full systems and even with the stock exhaust.

PS Eliminator

PAIR system eliminator module

Get rid of the FI light coming on when removing/disconnecting the PAIR system from your motorcycle. Get the job done right!

⚡ Tough design

The product comes in a rugged, 100% weatherproof housing and with a 2-year replacement warranty.

⚡ Plug 'n Go

No cutting and splicing needed. Just connect it and you're ready to go. It can't get any easier than this.

⚡ Proper solution

Eliminate the on-coming FI light when removing the PAIR system from the bike. This is a must have for racers!

SD Eliminator

Factory electronic steering damper eliminator module

The Steering Damper Eliminator will take care of the FI light coming on when disconnecting the OEM electronic steering damper on modern sportbikes.

⚡ Tough design

The product comes in a rugged, 100% weatherproof housing and with a 2-year replacement warranty.

⚡ Plug 'n Go

No cutting and splicing needed. Just connect it and you're ready to go. It can't get any easier than this.

⚡ Proper solution

Eliminate the on-coming FI light when replacing the OEM steering damper with a better quality, aftermarket unit.

Brake Light pro

Programmable brake light flash module

The smallest brake light flasher module in the world with 11 pattern options to choose from for added riding safety. Raises awareness of motorists behind you. No more tailgating thanks to this tiny but intelligent device. Compatible with almost all motorcycles, scooters, ATVs and even cars!

⚡ Safety first!

We've got your back covered! Wakes up drivers behind you – no more tailgating!

⚡ Highly advanced tech

Touch Sensor for easy setup and maximum reliability. Weather and waterproof design.

⚡ Smallest in the world

The smallest programmable intelligent flasher module in the world!

Compatible with most motorcycles, ATVs, scooters and even cars!

Thunder Box

Advanced power distribution module

Aftermarket running lights? Heated grips? GPS? Phone charger? An extra gauge or gadget? We have the solution for you! Connecting electric add-ons has never been this easy before. The Thunder Box not only extends battery life but protects the bike's electric system from overloading and short circuits. Get your power issues sorted – lightning fast!

⚡ Suitable for everyone

Available in 16A or 32A total capacity versions. Weatherproof USB charger is available separately.

⚡ Lightning fast connectivity

Connect auxiliary equipment fast, convenient and safe to the tool-free splitter terminals supplied. Just plug in the wires and you're set!

⚡ Advanced tech

Two working modes (automatic and ignition key controlled). Constant electronic protection (over current, short circuit). Fuseless design!

No more battery drainage! No more rough starts! Works on all vehicles.

Self Cancelling Flasher

Multi-mode turn signal control module

The new SCF module improves safety and comfort both on long trips and in the city. Compatible with most motorcycles, ATVs/ UTVs. Stable flashing rate, regardless whether bulbs or LEDs are used. Also adds the hazard warning light feature. Light, small and simple to install.

⚡ Overtake indication

A brief left or right move on the indicator switch: automatically blinks the turn signals three times. Great for overtaking.

⚡ Self-cancelling indication

A longer left or right move on the indicator switch: automatically blinks the turn signals for 10 seconds and cancels it. Comes handy in city traffic.

⚡ Indication of 'gratitude'

A rapid left-right move on the indicator switch: automatically lights all blinkers up three times as a 'thank you'.

STV Eliminator

Secondary throttle valve eliminator

Eliminate the FI light coming on when removing the secondary throttle valve (and disconnecting the actuator motor) from your motorcycle. Just plug it in and you're all set!

For racing purposes only, not suitable for street use!

⚡ Plug 'n Go design

The Plug 'n Go connector makes installation quick and easy, eliminating the need to alter the bike's original wiring.

⚡ Proper solution

Eliminates the FI light coming on when disconnecting the electronic actuator motor / removing the secondary butterfly valve(s) from the bike.

⚡ Advanced tech

The unit is completely sealed and epoxy encapsulated, extreme protection from shocks, vibrations and water.

➡ Product availability

We have distributors (sole importers) in 50 countries. With any sales inquiries (placing an order, price and availability, nearest dealer, becoming a dealer, etc) please contact the distributor in your country. We do not ship to countries where we have distributors. If your country is not listed, please order directly from our Online Shop.
